XR Salento 2023

Lecce
September 6, 2023 – September 9, 2023

The International Conference on eXtended Reality (XR Salento) is an event dedicated to the eXtended Reality (XR), the umbrella term that covers Virtual Reality (VR), Augmented Reality (AR) and Mixed Reality (MR).

For the first time, XR Salento is organised as a joint event and co-located with the 21st Eurographics Workshop on Graphics and Cultural Heritage (GCH 2023), to be held September 4-6, 2023. On September 6th the two conferences will have a special interactive session dedicated to 'XR for Cultural Heritage', which will contribute to cross-fertilization between the sectors.

XR SALENTO is an evolution of previous editions of the International Conference on Augmented Reality, Virtual Reality and Computer Graphics (Salento AVR), which had united the AR/VR community since 2014.

To cope with the increasing demand of application of XR technologies in several fields, XR Salento 2023 will also focus on topics such as Digital Twins embracing Internet of Things, Artificial Intelligence, and Data Mining to create a digital representation, gather and store real-time data, simulate the future state, and facilitate optimization.

The event provides a unique opportunity for discussion and debate among scientists, engineers, educators, students and allows them to connect with fellow entrepreneurs and companies operating in the sector, who are experiencing applications of these emerging technologies.
